

ELE ARMCHAIR

ELE ARMCHAIR

2022

Stainless Steel frame and legs, and seat upholstered with Gabriel confort fabric.

I worked for a month with no fixed goal in a space as big as a barn, with wooden planks and the surplus fabric I found there. Materialities and proposals were left behind throughout that time, an unsustainable object that you could not sit on. Over the next 5 years unfinished prototypes of this object and various photographs stayed with me. Now that it's finished, I once again see it as unfinished.
