CADENCE STOOL

The Cadence Stool is inspired by the simplicity and power of the rhythmic stepped brickwork visible in the architecture of Amsterdam's 'South Plan' area; the city development plan designed by H.P. Berlage in 1915. A flow of rhythmic volumes and shade lines. The Cadence stool functions as seating matching the table collection or as an individual side table.

Designed by Aad Bos and crafted in the Netherlands.

MATERIALS

- Solid European oak or American walnut
- Color and finish of choice
